

Expedition Series:
Ultra-warm expedition specific performance

Summit Series:
Mountaineering specific performance

Summit Alpine Series:
Minimalist ultra-lightweight pursuits

Quantum Endurance Series:
All mountain, lightweight and weather resistant

Quantum Series:
All mountain, ultra-lightweight performance and comfort

Atlas Endurance Series:
All mountain performance, weather resistance and comfort

Atlas Series:
All mountain performance and comfort

Atlas Explorer Series:
Travel, backpacking and camping

All Rab performance sleeping bags use Pertex® fabrics and are filled in Derbyshire using superior quality European down. This achieves freshness of fill and avoids the long term compression incurred through filling in the Far East, resulting in a better quality of product.

The Rab Sleeping bag ranges are featured to deliver the optimum characteristics for a wide range of environments.

Box wall construction allows maximum lofting for minimal weight

Summit 900 and 1100 models utilise an intricate construction comprised of trapezoidal base wall baffles and slant side wall baffles to ensure maximum warmth through optimum down coverage and loft.
